Mean 6,144.8 4,703.0 25,917.9
 Median 464.8 831.5 4,507.2

* Employee emissions intensity, metric tons of CO2 from Scope 1 and Scope 2 emissions.

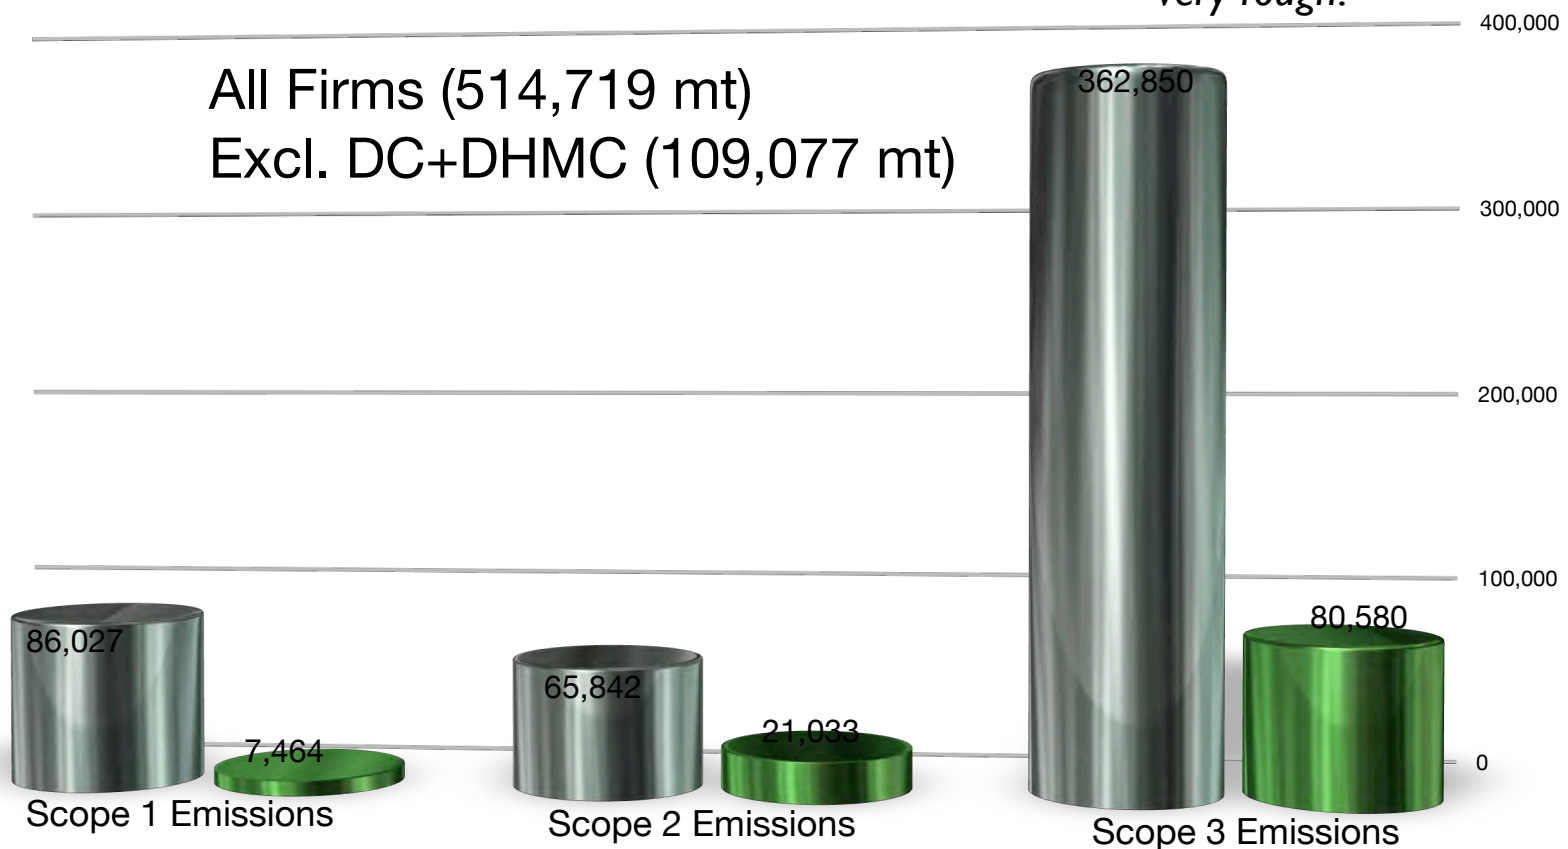

Employee emissions intensity metric tons of CO2 from scope 1 and scope 2 emissions

MEAN 6,144.8 4,703.0 25,917.9
 MEDIAN 464.8 831.5 4,507.2

Quantity of Emissions by Scope (Metric Tons)

*Note: Scope 3
estimates are
very rough!*

Percent Emissions by Scope: All Firms, and Firms excl. DC+DHMC

All Firms
(~515K mt)

Scope 1 Emissions
Scope 3 Emissions

Scope 2 Emissions

Excl. DC+DHMC
(~109K mt)

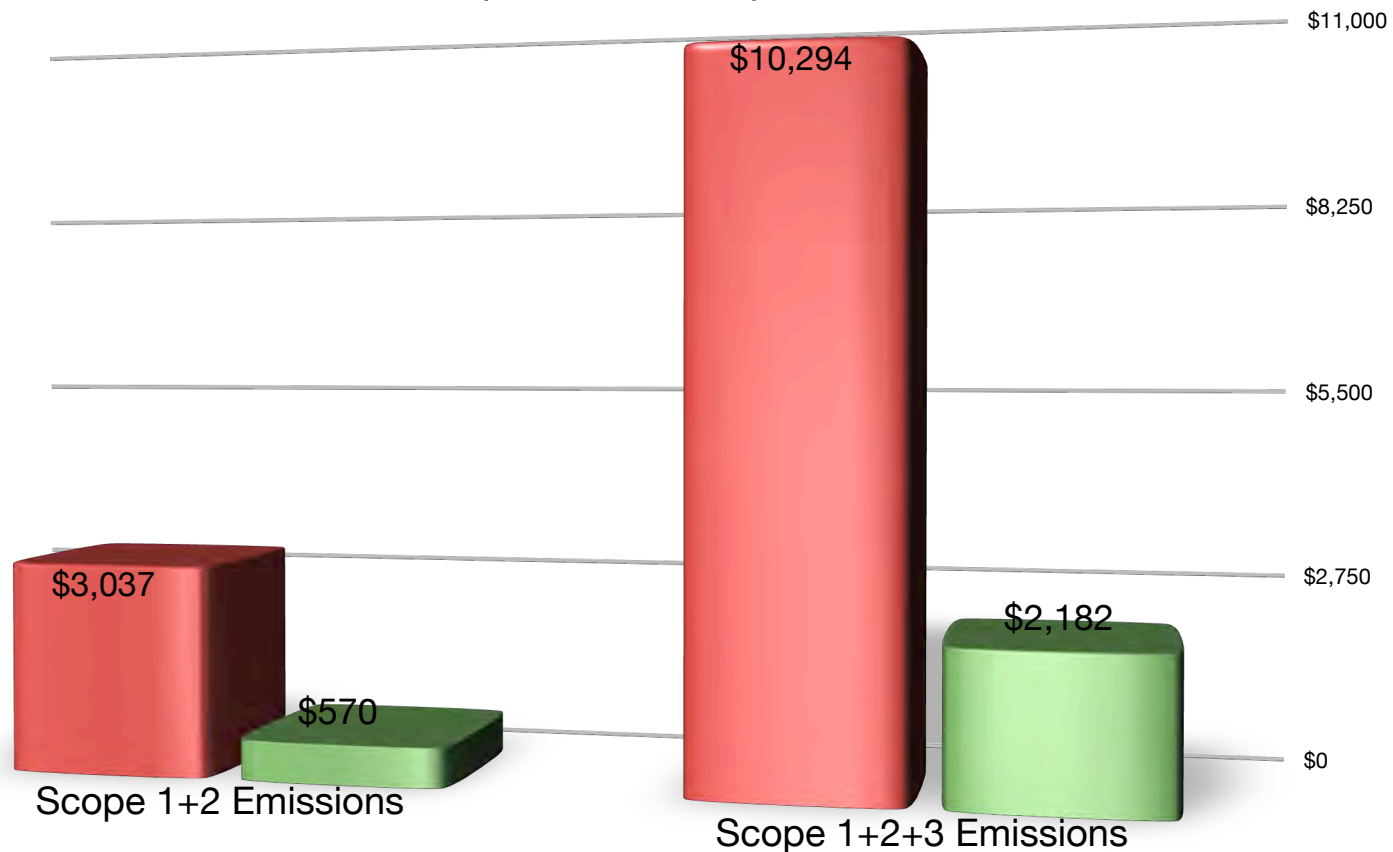

Scope 1 Emissions
Scope 3 Emissions

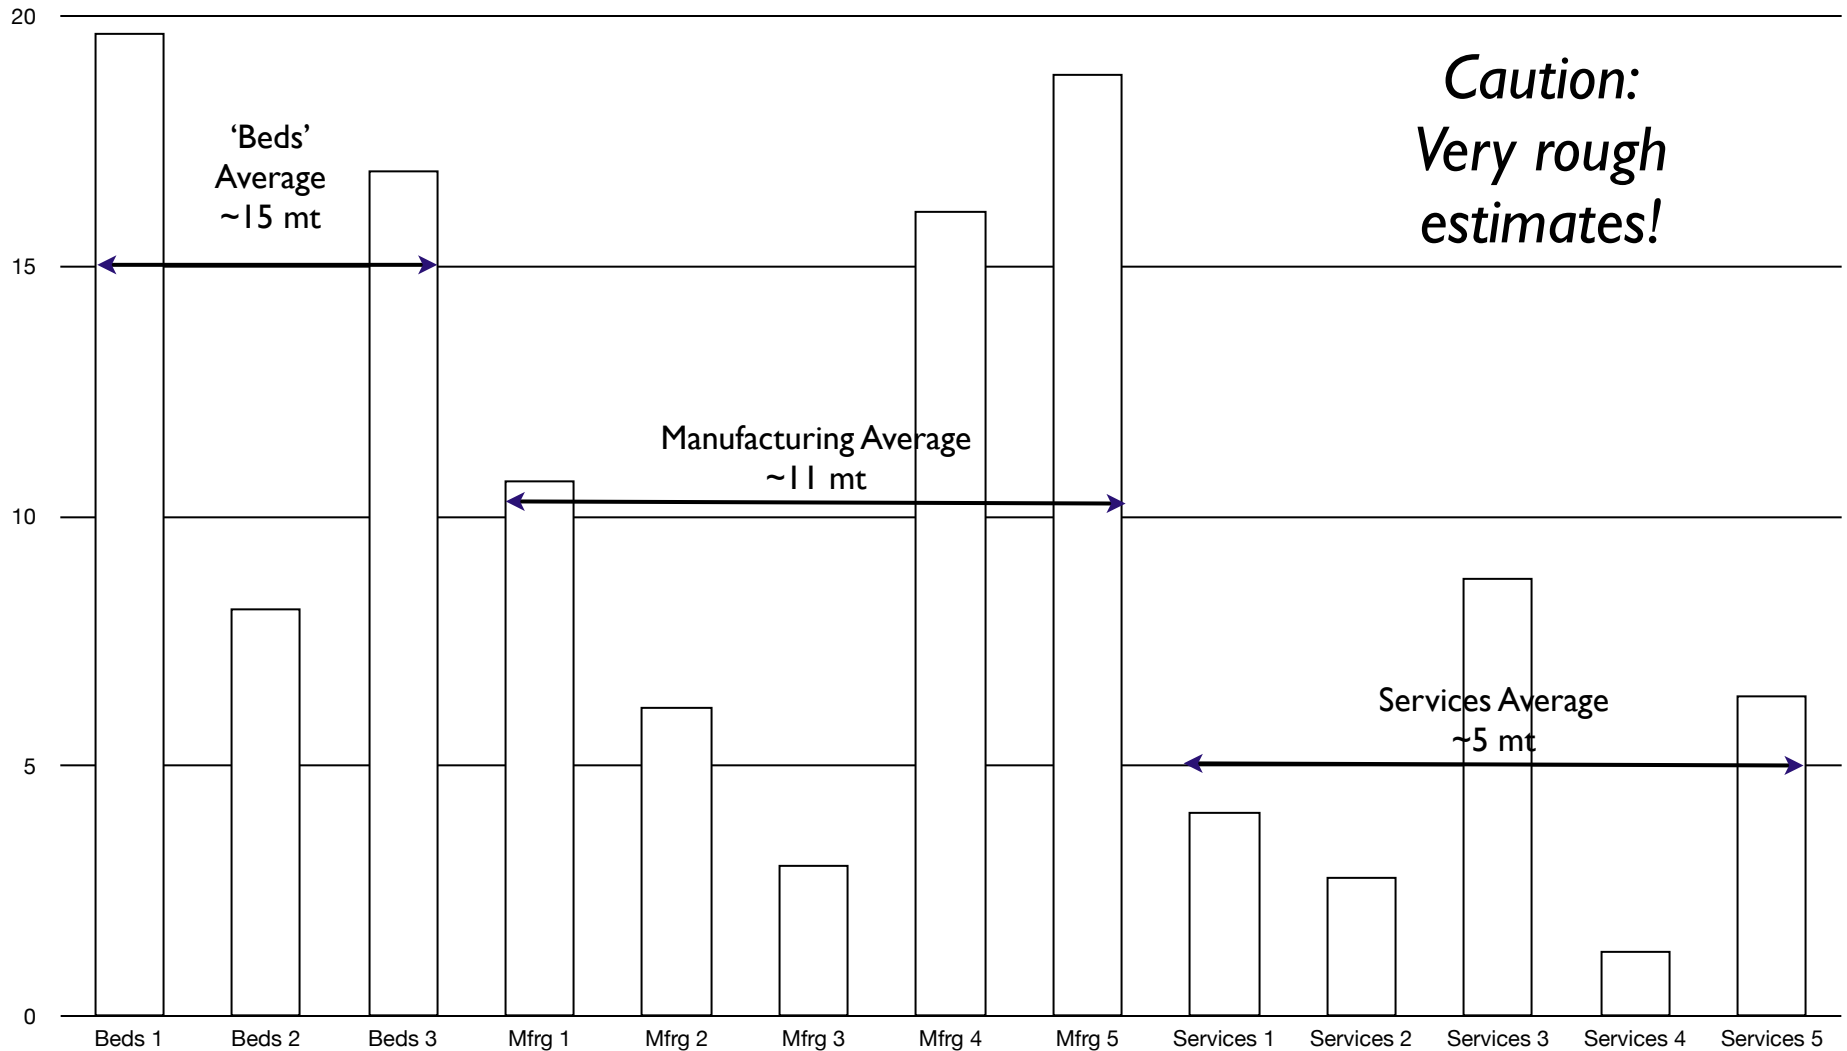

Scope 2 Emissions

Annual Cost of Emissions in a Carbon-Priced World (\$ '000)*

All Firms (\$10.3 million)
Excl. DC+DHMC (\$2.2 million)

Employee Intensity of Scope 1+2 Emissions, by 'Beds' v. Manufacturing v. Services (metric tons per employee)

Opportunities/Challenges

- Renewable energy v. 'smarter' commuting
- If renewable energy:
 - Collective annual electricity use: ~155,000 MWh
 - What can \$3 million a year buy you?
- If smarter commuting:
 - Collective efforts
 - Individual efforts
- Energy efficiency investments?
- Take on influencing public policy as a group?
 - RE mandates; feed-in tariffs; tax breaks; other?
 - Take a position on nuclear?
