

City of Lebanon

# Energy Initiatives

# Sustainability Principles

## Principle #3 – Environmental Responsibility and Energy Efficiency

Does the action. . .

- Sustain and enhance a healthy natural environment: air, water, soil, and ecosystems?
- Promote and reinforce a network ("green infrastructure") of protected open space and natural areas?
- Improve energy efficiency and reduce the City's carbon footprint?
- Engage the Lebanon community to conserve energy and adopt more sustainable technologies for heating, cooling, lighting, transportation, and so forth?

# Strategies

- Solar projects
  - Airport
  - Roof mounted units on Municipal Buildings
- Alternative Energy Property Tax Exemption (Solar, Wind and Biomass)
- Landfill Gas to Energy Project
- LED Streetlight Project
- Create Energy Efficient Buildings
