VTEN partners work every day to give Vermonters better, more efficient transportation options. Here are some ways our work is making a difference:

- Transit ridership statewide (SFY16) has increased 5% in the last five years
- Using public transit can save a typical 2-person household an average $6,251 every year
- Eliminating one car and taking public transit can reduce household carbon emissions by 30%
- People living in neighborhoods with sidewalks are 47% more likely to be active 30 minutes a day
- 11,000+ people participated in the 2016 Way to Go! Challenge saving an estimated 740,000 pounds of carbon emissions
- 45.4% of Vermonters bike at least once per year
