SOLARIZE UPPER VALLEY LYME

Request a free solar site assessment at:

vitalcommunities.org/solarize/lyme

Aerial imagery suggests that there is a potentially unshaded south-facing roof lazing about on your property. If you'd like to learn how to put that roof to work for you harvesting clean, grid-tied (no batteries required!) solar electricity, check out the web site on the front of this card, and sign up for a free site visit from our partner installer, RGS Energy. Time is running short, but it's not too late – the Solarize Lyme program ends June 30!

*Sun*cerely,
Your Solarize Lyme volunteer team

…because a good roof is a terrible thing to waste…
