

# New Homes in Our Communities 2010 to 2019

## Units Added Each Year

— Total    — 12 Most Populous    — Under 4,000 Population

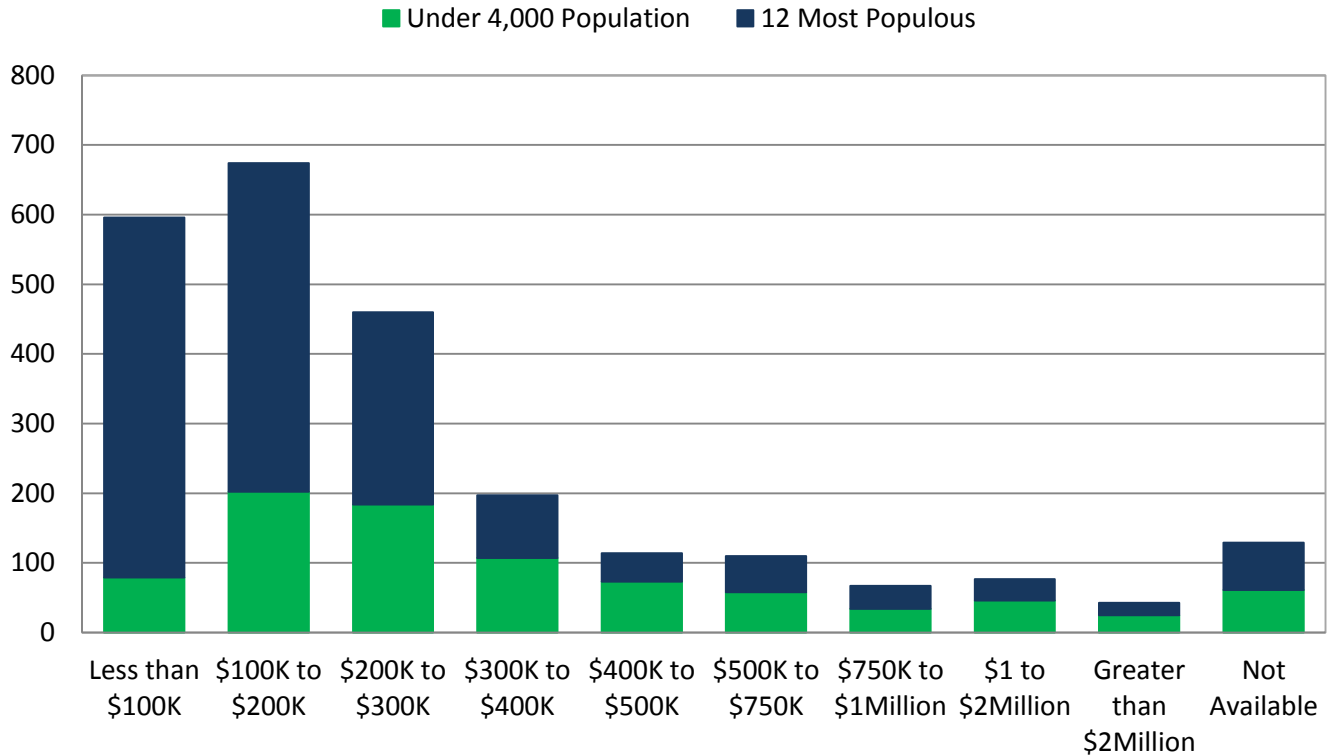

## Types of Units Added

**Definition**  
A new home, or place to live, is any housing unit addition that was not previously available on that parcel and is considered a built structure by municipal assessors or listers.

In the Vital Communities Service Area  
29 municipalities participated. [Details for each town at this link.](#)

## New Units - Assessed Value

## New Units - Number of Bedrooms

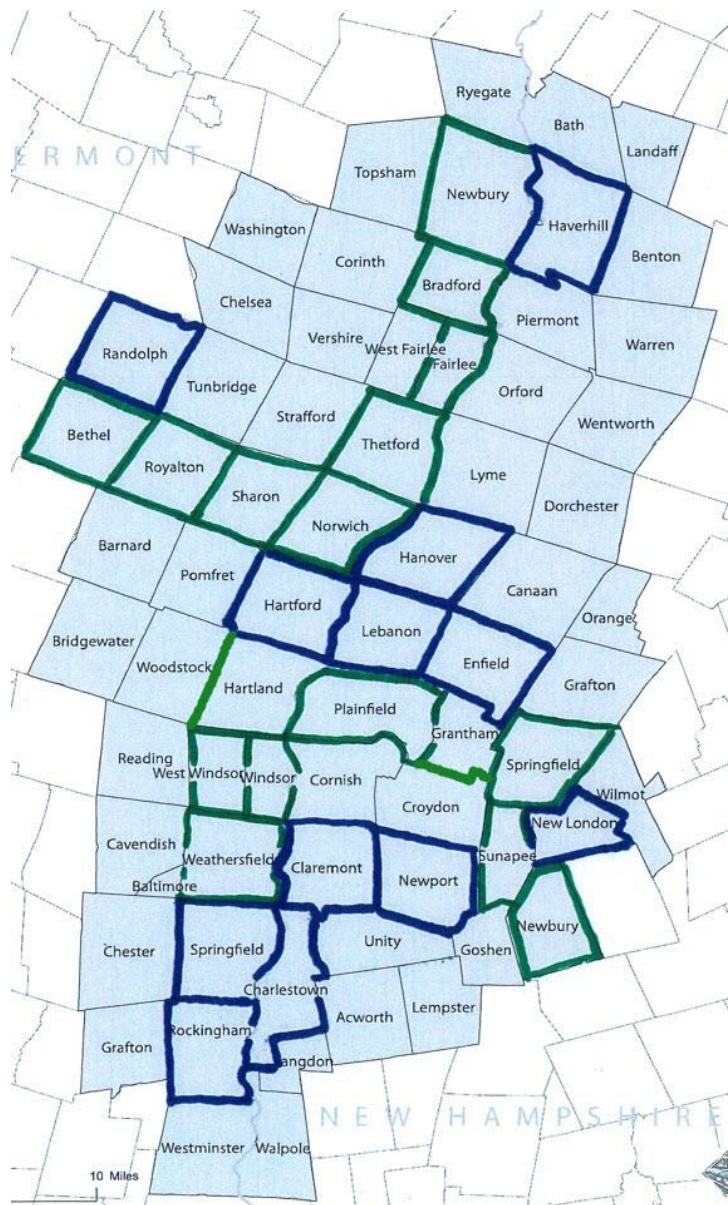

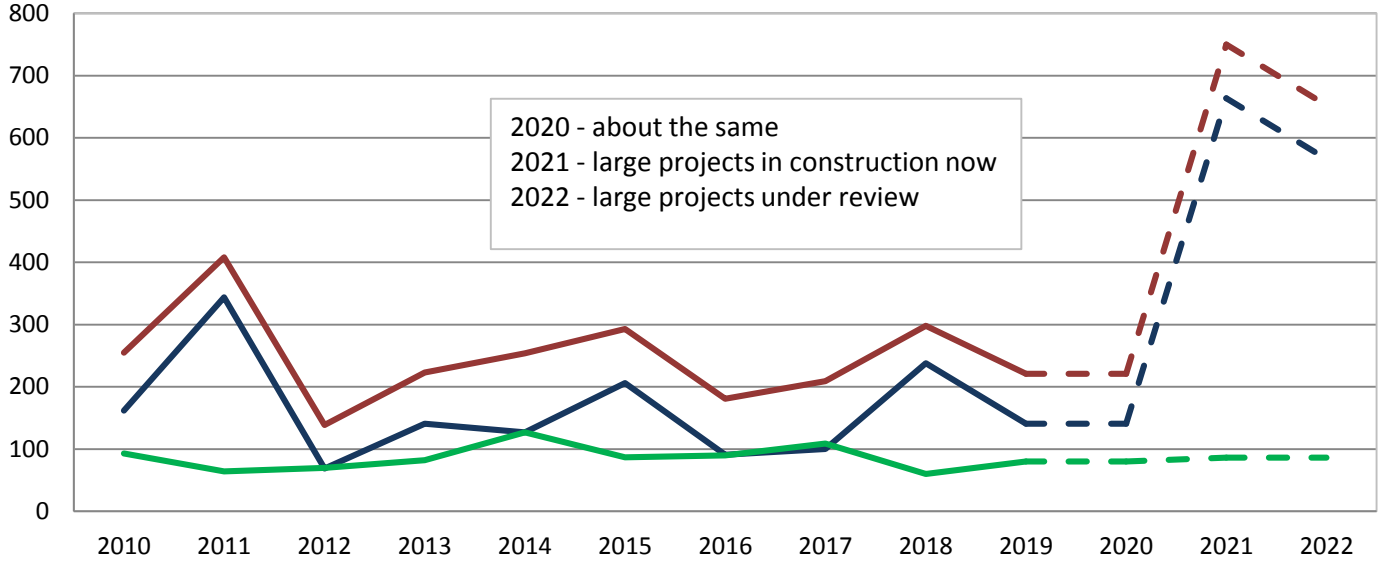

### How did we count new place to live?

We started by discussing available data with municipal staff, then created a list of all potential new housing units from the building permit log (either by municipal or project staff). Where building permits are not done or a log unavailable, a report was produced from the municipal assessing department. That list was cross referenced with parcel/lister cards to confirm housing unit by the “year built”. Unit details were recorded. The final numbers were validated by staff in each community.

# What is in the Pipeline?

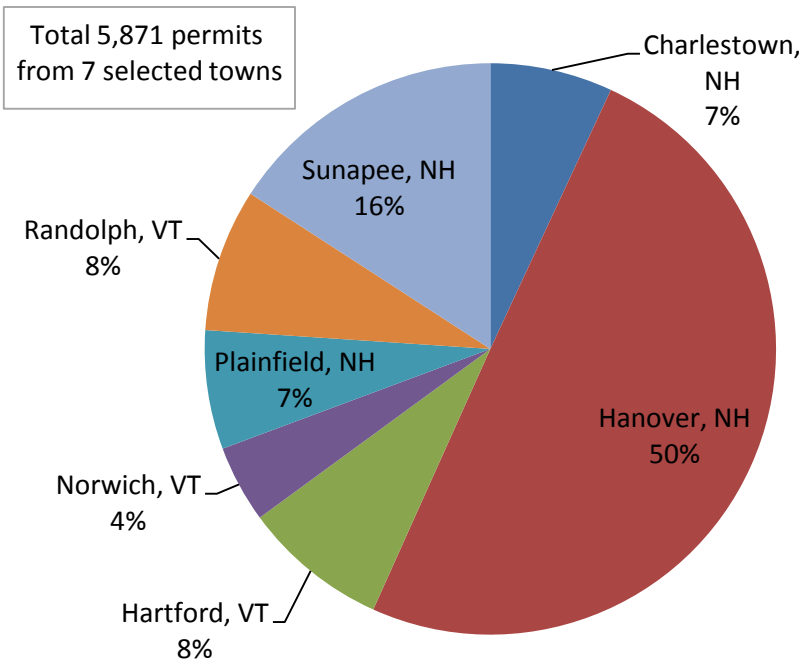

— Total    — 12 Most Populous    — Under 4,000 Population

**New Homes Participating Municipalities**  
  12 Largest in Population  
  Under 4,000 Population
